INTELLIGENT LOCKER SYSTEMS

| Apartments | Corporate Offices | Mailrooms | Retail Locations |

Easy parcel management with secured delivery and collection

Hollman Intelligent Lockers offer a cost-efficient solution for 24/7 delivery and secure pickup for mail as well as small and medium parcels. It's a convenient option for residents and customers who want secure deliveries at their apartments, offices, or other locations. Packages are secured in lockers, eliminating concerns about theft and the system is active 24 hours a day to be available for any schedule.

Offer a new valuable amenity – save staff resources

- Resident Satisfaction: With our smart lockers, your residents and customers can pick up packages on their time.

- Free Up Staff: Staff is better able to serve their resident's other needs because they don't need to spend so much time managing packages.

- Eliminate Package Theft: Packages are stored securely, requiring a code to be entered for retrieval.

- Lower Costs: Eliminate hours receiving and distributing parcels.

- 24/7 Access To Parcels: Packages can be retrieved any time that is convenient.

- Attractive Amenity: With our design-centric features, Intelligent Lockers set the standard and help add value to the property.

The Lockers

Intelligent Locker Systems are available in a variety of finishes to complement with any location from high-end apartment lobbies to corporate offices. Both laminate and high-grade veneers are available
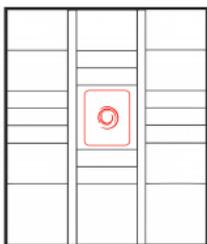

They are built in our state of the art plant in Irving, Texas. We use only premium materials and lockers are built with our high-durability, industry leading DGS process (doweled, glued, screwed) for lasting stability.

The Technology

Behind their sleek exteriors, ILS systems are controlled by a system of internet connected computers that track where a package is stored, issue a single-use code for retrieval, and automatically open the door to that location when the owner enters the code into the touch-screen kiosk.

Intelligent Locker Systems Simplify Parcel Delivery and Collection

Parcel Delivery

Parcels are delivered and checked into the system.

They system keeps track of which lockers are occupied and directs new parcels to be placed in available locations based on their size for best utilization of the space.

Text Sent to Recipient

When a parcel is checked in, a text is automatically sent to the recipient with a single-use code for retrieval.

Parcel Pick-up

At their leisure, recipients enter their code into the touch-screen kiosk and the locker containing their parcel automatically opens.
