Competition-level court solutions from a single provider

Hollman’s commitment to provide world-class racquetball and squash courts has made us an industry leader. We manufacture and install our own wall panels and glass systems with every step subject to total in-house quality control.

Hollman’s panels can be applied against the most common types of framework: steel studs, wood studs, or wood furring. The panels are set in place with adhesive and screwed through the base of the top tongue, pulling each panel tight and flush against the framing members. This ensures the smoothest playing surface and the tightest seam fits possible. We stagger each row of panels to create the interlocking design that is the Hollman trademark of quality.

Our tournament tested courts are accepted and approved by the American Amateur Racquetball Association and the World Squash Federation and are backed by a 10-year manufacturer’s warranty.

Hollman courts are tournament tested and comply with USA Racquetball Association (USRA) specifications.
Rough Framing Dimensions

Length: 40'2” (12.24m) from the face of the front wall studs to the face of the opposing wall studs.
Width: 20’1-¾” (6.14m) from the face of the left side wall studs to the face of the opposing right side wall studs.
Height: 20'2 -½" (6.16m) from the low point in the concrete slab to the bottom of the joist. This dimension utilizes the standard floor height of 2-⁵⁄₈”. If an other floor height is utilized, contact our office.

General Specifications
• 1-¹⁄₈” Thick front wall (⁷⁄₈” thick side walls, 5/8” thick ceilings) 4’ x 8’ tongue-and-groove (T&G) high impact wall panels installed in staggered configuration.
• Surface: High pressure .05” thick laminate shall be on both side of panels
• Core: Industrial grade high density particle board with an overall panel composite density of 55#/cf.

(For more information or complete architectural specs, please call (972) 815-4000 or reference our website www.hollman.com.)

These features result in a very dense, extremely tough surface designed to withstand the rigors of professional play and comply with USA Racquetball Association (USRA) specifications.

We offer a turnkey solution for racquetball court construction that incorporates all aspects and features of the court. Hollman comprehensive full-service solution includes the design, materials and construction of the entire project to ensure that the squash court meets the highest standards in quality and safety.

Our complete solution includes:
• Walls and Ceilings
• Framing
• Glass Walls – stationary or movable
• Solid Core Door Option
• Floors Systems and Gamelines
• Consulting and Design Services
• Doors
• Light Fixtures
• Walleyball Kits & Storage compartments for valuables
• Installation
