

Technical Information

Integrated USB Charging Stations

USB Outlet in Locker

Top View, Lockers with HUB and USB Cables

USB Hub

- Each locker opening will include a single USB outlet finished with a stainless steel plate. (Users can plug phones or other devices in to charge via a standard USB cable.)
- On the back of the lockers, USB cables will extend from each outlet to plug into the USB hub (provided by Hollman).
- Six-port USB hubs will be mounted on the tops the lockers. A single hub will be shared by six locker openings and mounted on the center locker. (For example, with two-tiered lockers, one hub would be provided for every 3 lockers.)
- Hubs can be plugged into a standard American three-pronged outlet, which must be provided on site.

USB Hub

(Part No: 21882)

Technical Specs:

1. 6-port 60-watt USB charger for charging phones, tablets, and other devices; each USB port can provide up to 2.4 Amps of power
2. Charges up to 6 devices at a time; built-in device detection to deliver full speed charging capabilities, double charging speed to standard charging.
3. Optimized smart chip for stable charging Android, IOS other
4. Approved with CE/FCC/ROSH/PSE/CCC
5. Includes a 5 ft power cable
6. Measures approximately 5.7 x 3.1 x 1.1 inches (LxWxH)
